DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I. Claims 1-9, 15, and 16, drawn to a method for determining van der Waals parameters, classified in class 703, subclass 11.

Group II. Claims 10-14 and 17, drawn to a method for numerical optimization of a molecular crystal structure, classified in class 703, subclass 11.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of Group I is a process for determining van der Waals parameters comprising defining a deviation function quantifying differences between reference data and simulated crystal data.

The special technical feature of Group II is a process for numerical optimization of a molecular crystal structure comprising defining a so-called natural coordinate system, representing a crystal lattice in said so-called natural coordinate system,

transforming coordinates, calculating lattice energies, and transforming said energy derivatives.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
